"Mechanism of Inhibition of Inflammatory Edema by Caffeine with Regard to Serotonin."

Prague, Casopis Lekaru Ceskych, Vol 102, No 20, 17 May 63; pp 554-558.

Abstract [English summary modified]: Studies in vitro (caffeine antagonism of serotonin-induced contraction of rat ileum) and in rats, administering caffeine and epinephrine s.c. either in loco (planta pedis) or dorsum after subplantar injection of dextran, formalin or serotonin to induce edema. Results indicate that caffeine inhibits edema not by serotonin antagonism but but a regulatory process probably involving catecholamines. Six graphs; 1 Soviet, 5 Czech and 6 Western references.

"The Influence of Phenylbutazone and Ketophenylbutazone on Metabolic Changes of the Skeletal Muscle of a Rat Extremity Affected by an Inflammation."

Praque, Ceskoslovenska Fysiologie, Vol 15, No 5, Sep 66, pp 408 - 409

Abstract: After 3 days of nociceptive irritation it was found that phenylbutazone does not influence the glycogen level in a healthy or an affected extremity, while ketophenylbutazone decreases the glycogen level in the affected muscle. The effect after 14 days of application is the same for both drugs. However, ketophenylbutazone increases the loss of weight of the dry muscle, while phenylbutazone reduces the atrophy. 1 Western, 1 Czech reference. TITLE: Some Questions on the Development of Transporting Gross Cargoes (Nekotoryye voprosy razvitiya transporta massovykh gruzov)

PERIODICAL: Mekhanizatsiya i avtomatizatsiya proizvodstva, 1959, Nr 3, pp 6-8 (USSR)

ABSTRACT: At the 21st Party Congress N.S. Khrushchev announced in his speech, that the Socialist countries must win the battle of time in the peaceful contest between Socialism and Capitalism. Consequently the development of automated transport is of great importance. The author is of the opinion, that automation is the only answer to the problem of mass transportation of goods over long distances, in view of the lack of a highly developed railroad network, and frequently unfavorable climatic conditions. The factories, mines, etc. mostly use nowadays the conveyor forms of transportation, but the right speed has not yet been reached. Vibration transport

Card 1/2

SOV/18 -59-3-2/22

vehicles, used in the chemical, mining and food industries, demand less power. The use of hydraulic transportation methods in the mines and chemical industry is increasing. To dispatch goods, pneumatic type transportation will be used in the future. The hermetic sealing allows improved transportation of perishable cargo, and facilitates working conditions. Transportation of goods such as cement and flour, in tanks and containers, which can be pneumatically loaded and unloaded, is of great importance. For wider application of automated transportation production of necessary machines must increase by 20-38% during the Seven Year Plan period.

"Forestier's Disease and Its Differentiation from Ankylosing Spondylitis."

Zagreb, Liječnički Vjesnik, Vol 85, No 9, September 1963, pp 989-994.

Abstract: [Authors' English summary modified] The authors discuss the clinical aspects of Forestier's disease (or Forestier's syndrome, as is here suggested), i.e., degenerative spinal ankylotic hyperostosis, a knowledge of which is desirable for purposes of differentiation from ankylotic spondylitis. Following a description of three cases of which the authors have personal knowledge, a differential table of diagnostic characteristics is provided.

Four photographs, one table, nine Western and one Yugoslav recent references.

Title : New Species of the Genus Villeneuveviella Austen
(Erythrostrus Seguy) from USSR and Iran
(Diptera, Calliphoridae).

Orig Pub : Entomol. obozreniye, 1957, 36, No 2, 538-546

Abstract : Five new species were described (with figures):
V. stackelbergi (Mangishlak Peninsula), V.
territivora (Turkmenia, Chardzhouskaya Oblast),
V. noctivaga (Turkmenia, Maryyskaya Oblast), V.
seguyi (Iran, Baluchistan), and V. zimini (Boheran).
Earlier, the species of the genus Villeneuveviella
were known in Morocco, Algeria and Tunisia.
Identification table of the species is given. --
L.V. Zimina
